

Use cases: Data

- Unique datasets
- Valuable for biologists
- Valuable for software developers
- Institutional servers / services
- <https://idr.openmicroscopy.org/>
- <https://zenodo.org>

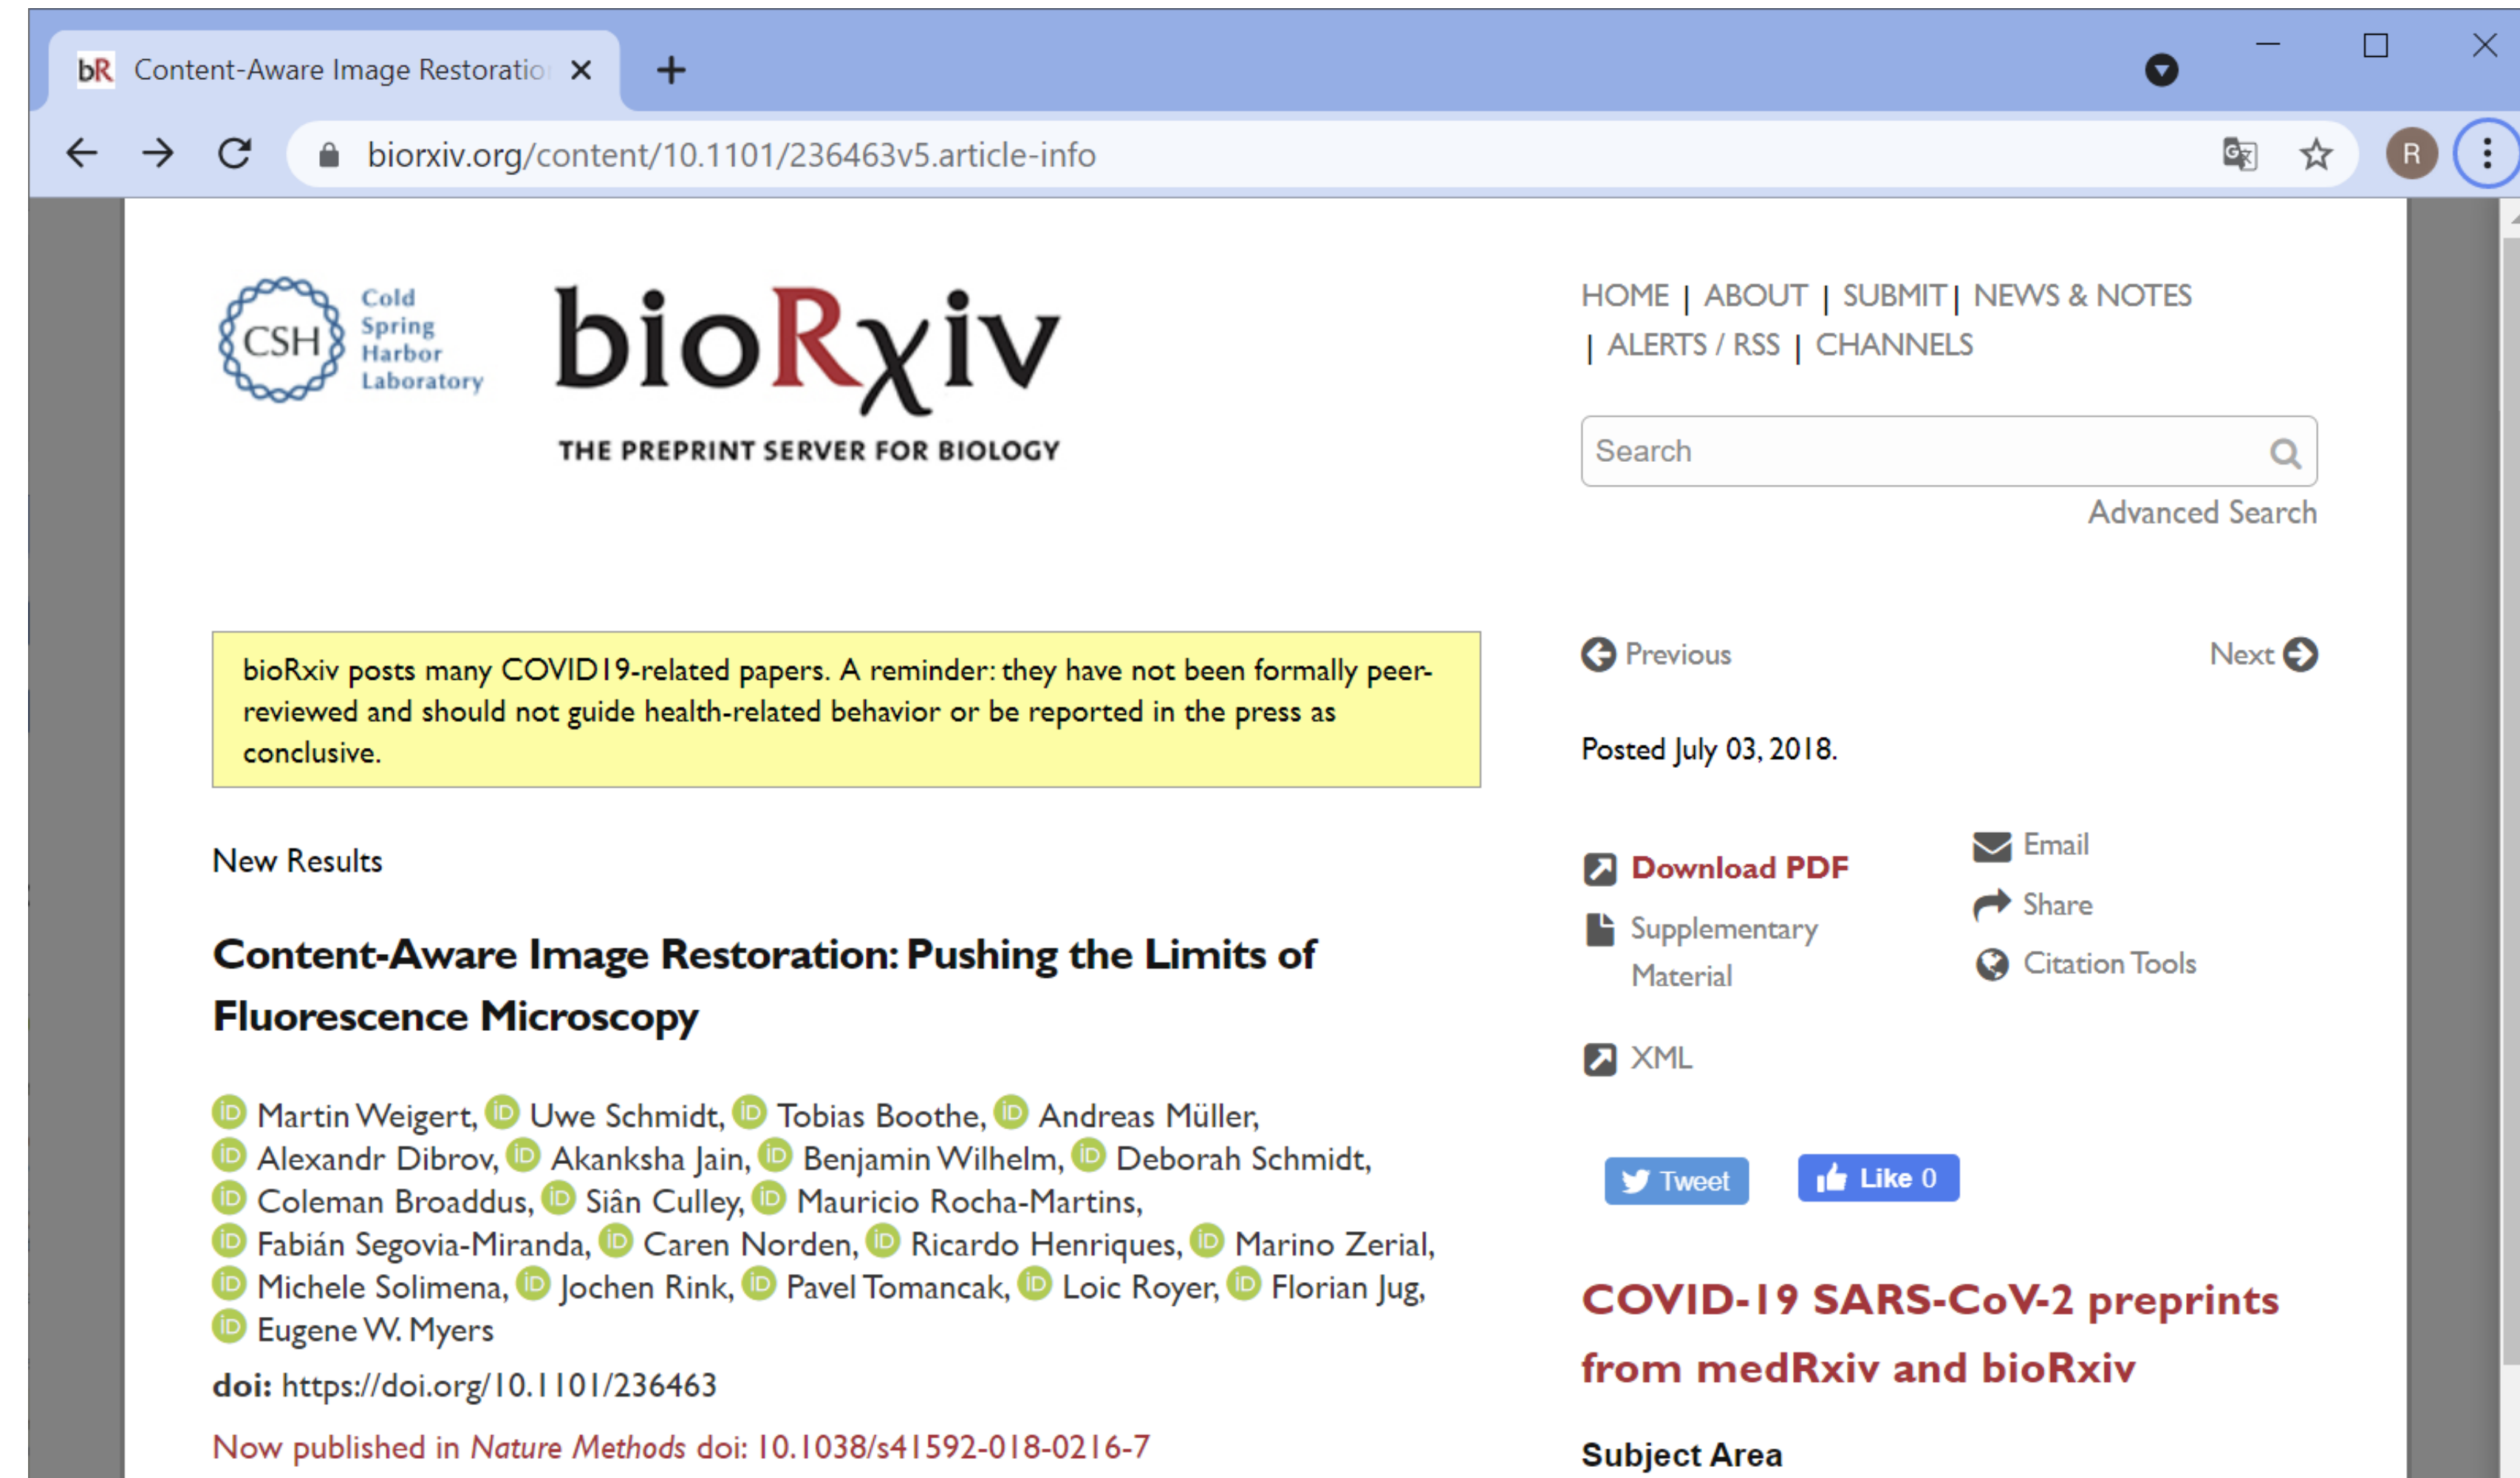

<https://rodare.hzdr.de/record/915>

<https://twitter.com/nKiaru/status/1409194004219142148?s=20>

Use cases: Manuscripts

- Preprints
 - Accessible / reusable
 - <https://arxiv.org/>
 - <https://biorxiv.org/>
 - <https://medrxiv.org/>
- Journals

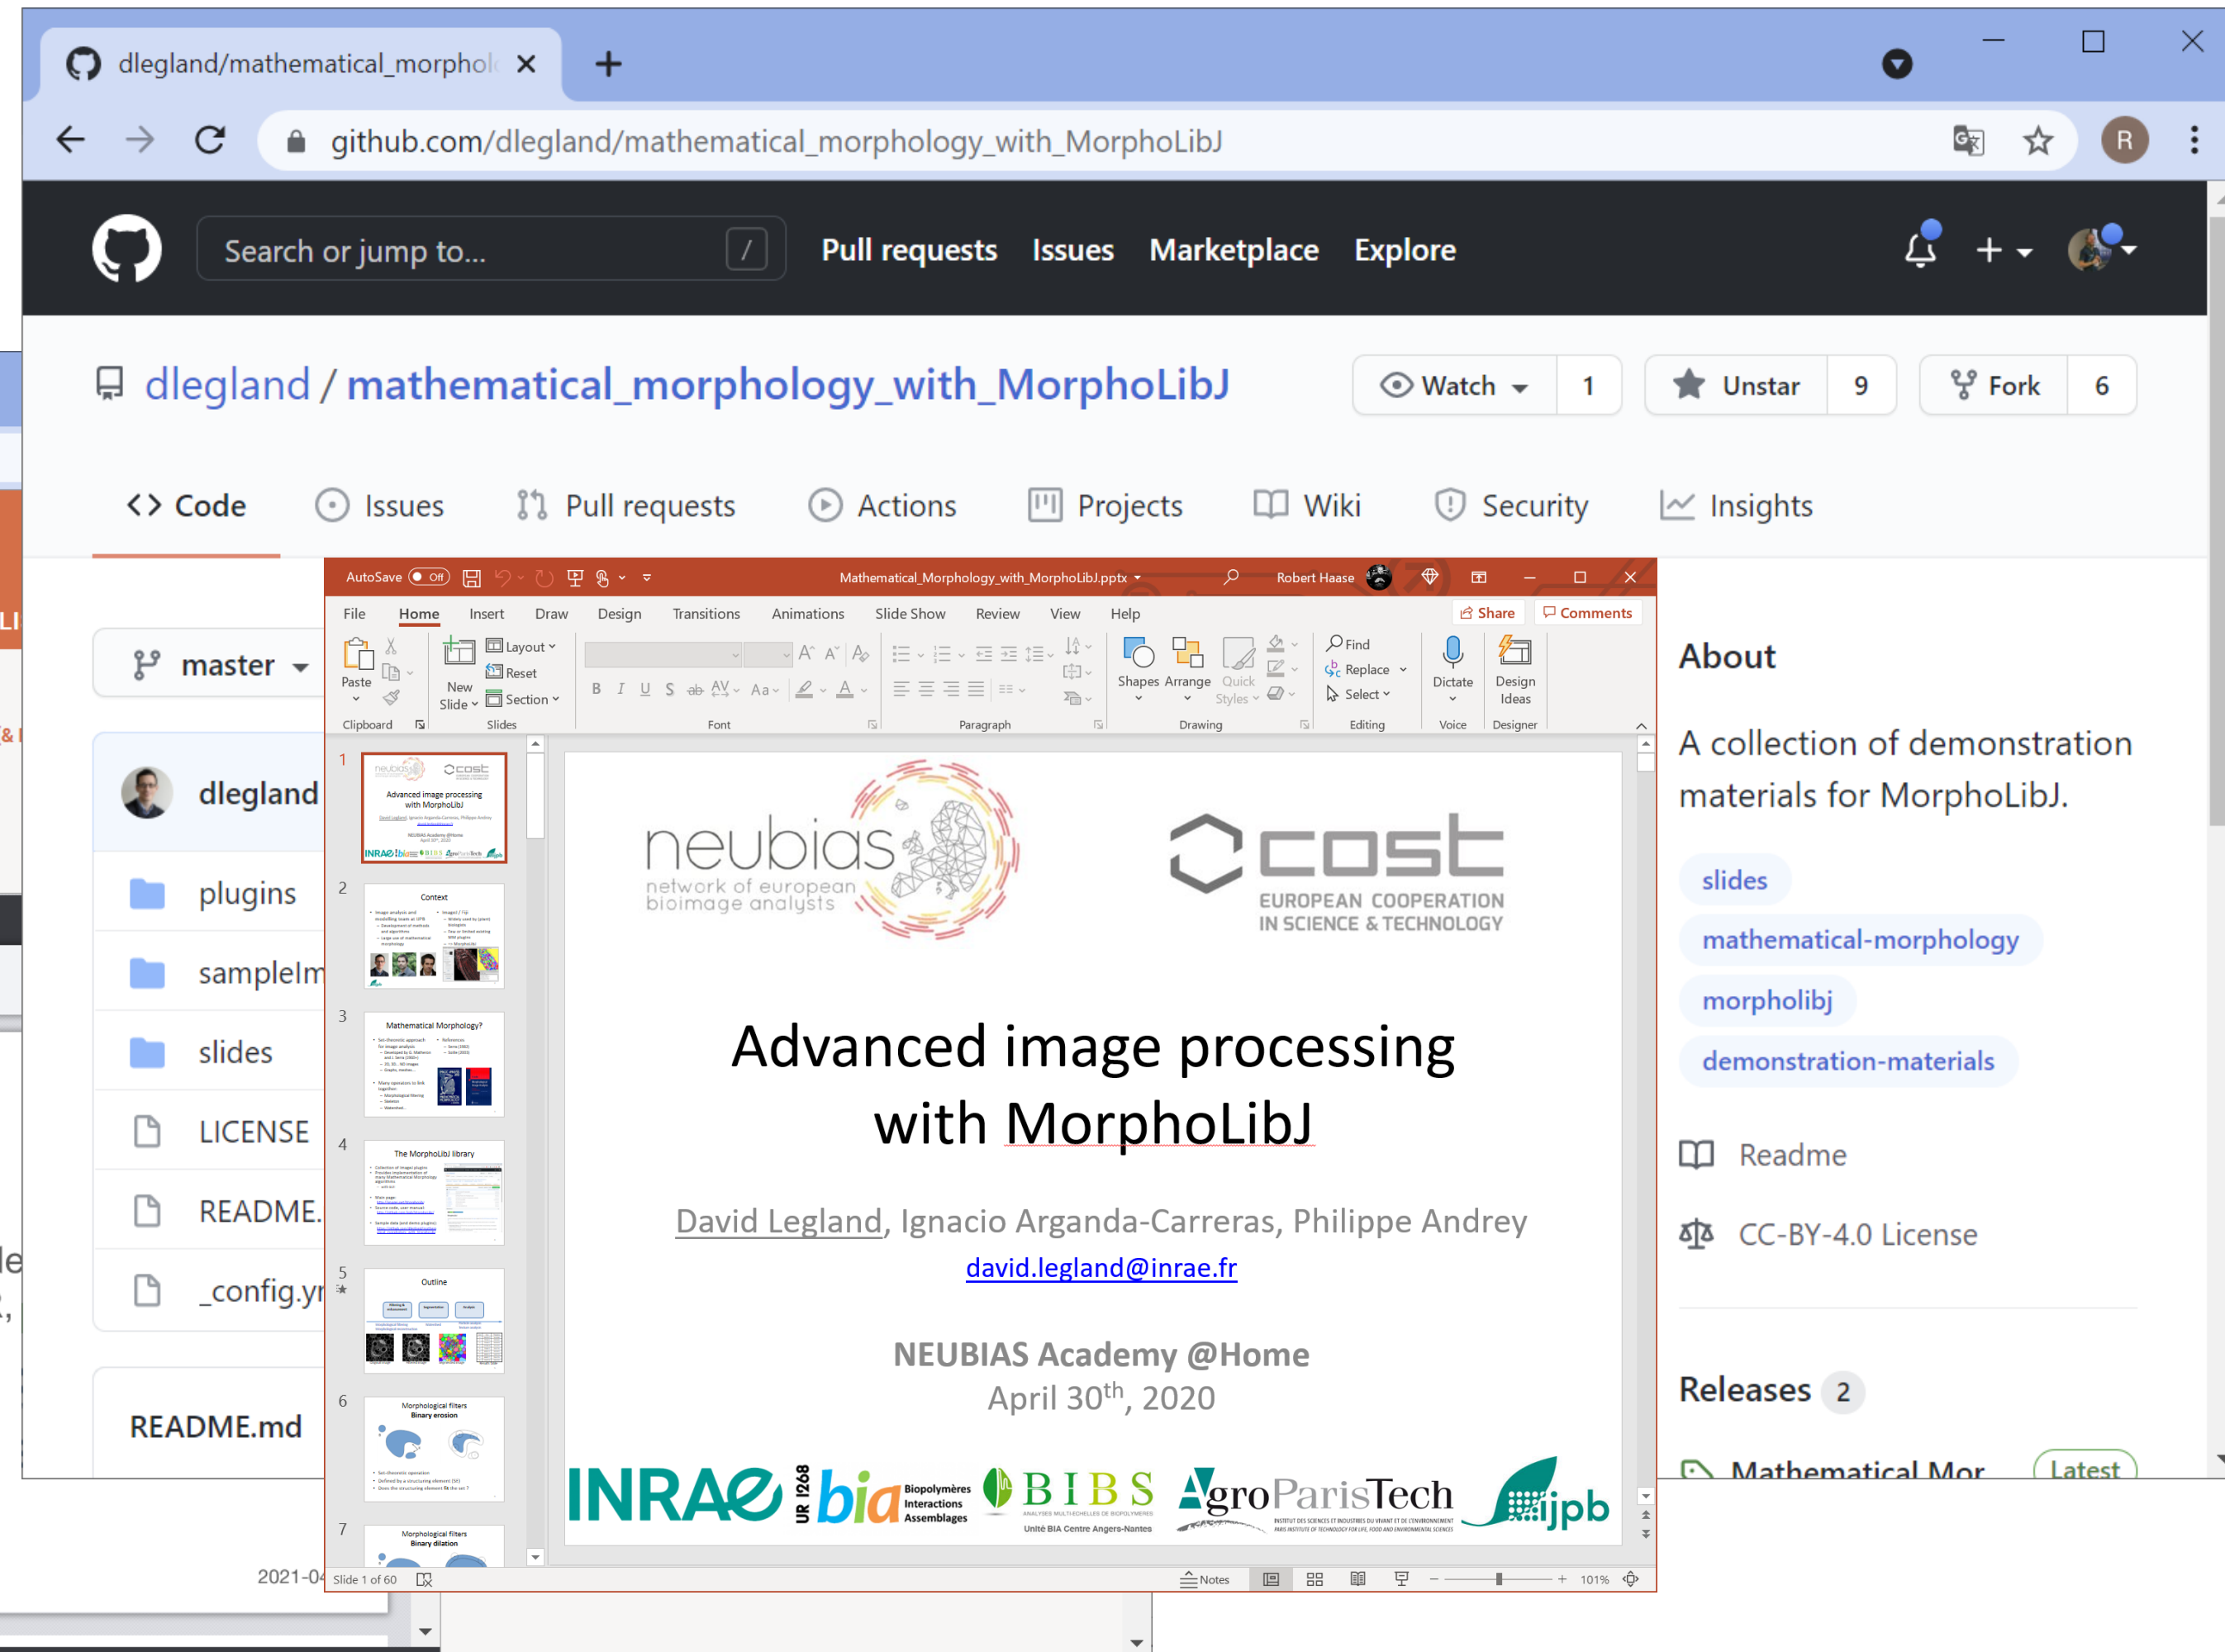

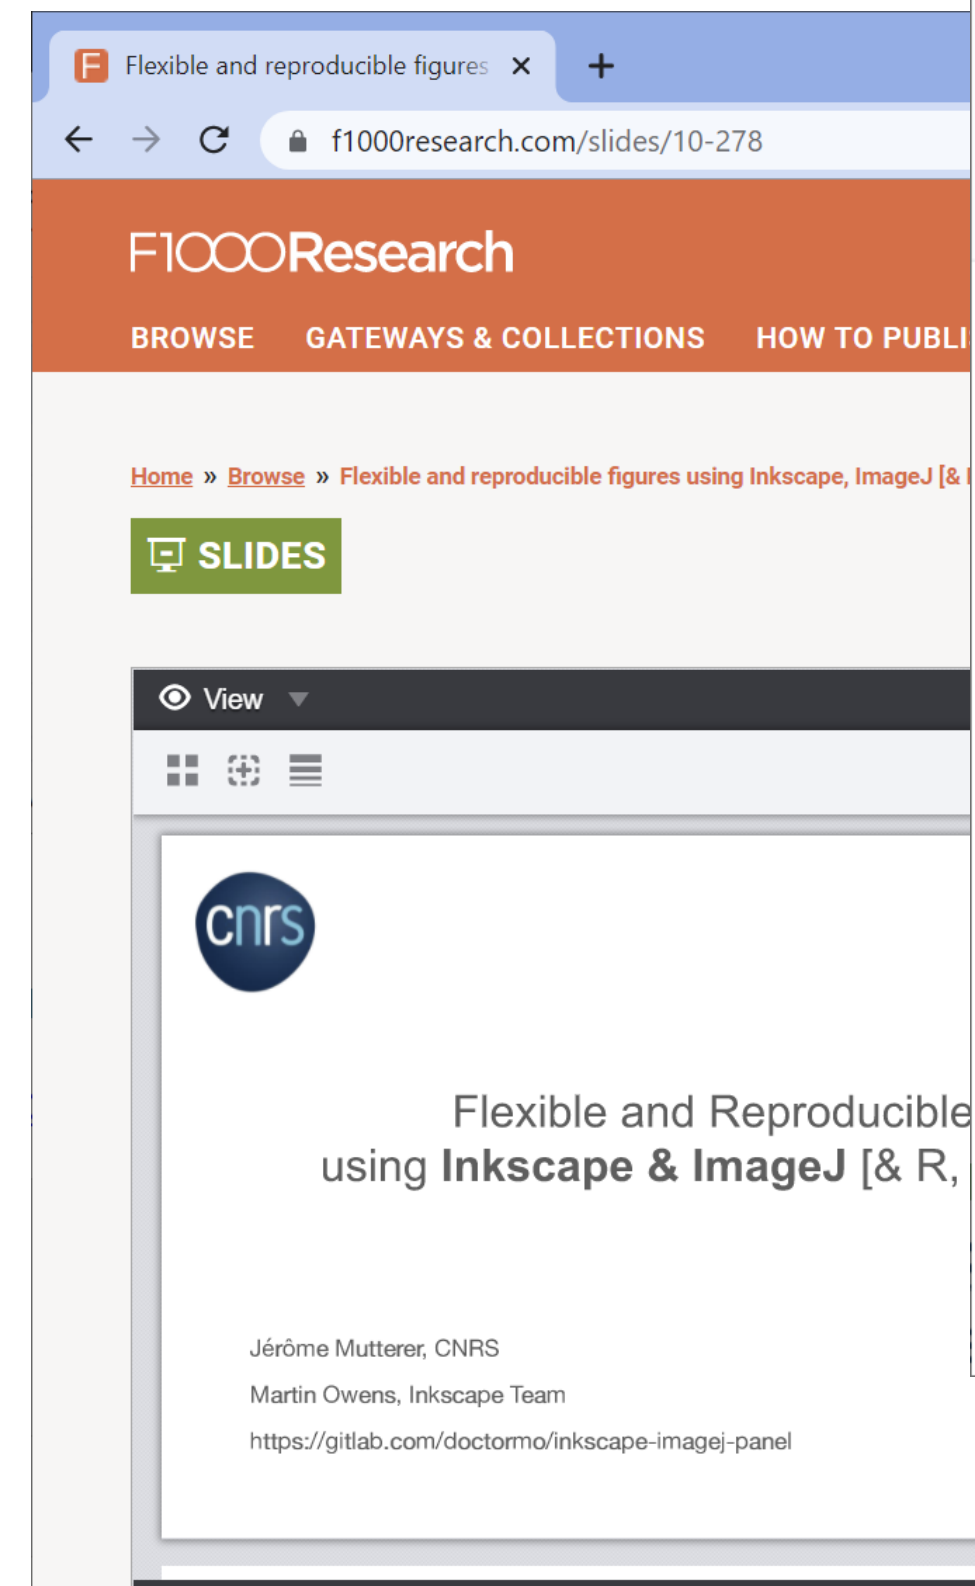

The screenshot shows a web browser window displaying a bioRxiv article. The address bar shows the URL <https://www.biorxiv.org/content/10.1101/236463v5.article-info>. The page header includes the Cold Spring Harbor Laboratory logo and the bioRxiv logo with the tagline 'THE PREPRINT SERVER FOR BIOLOGY'. A navigation bar on the right contains links for HOME, ABOUT, SUBMIT, NEWS & NOTES, ALERTS / RSS, and CHANNELS. Below this is a search bar and an 'Advanced Search' link. A yellow warning box states: 'bioRxiv posts many COVID19-related papers. A reminder: they have not been formally peer-reviewed and should not guide health-related behavior or be reported in the press as conclusive.' The article title is 'Content-Aware Image Restoration: Pushing the Limits of Fluorescence Microscopy'. The authors listed are Martin Weigert, Uwe Schmidt, Tobias Boothe, Andreas Müller, Alexandr Dibrov, Akanksha Jain, Benjamin Wilhelm, Deborah Schmidt, Coleman Broaddus, Siân Culley, Mauricio Rocha-Martins, Fabián Segovia-Miranda, Caren Norden, Ricardo Henriques, Marino Zerial, Michele Solimena, Jochen Rink, Pavel Tomancak, Loic Royer, Florian Jug, and Eugene W. Myers. The DOI is <https://doi.org/10.1101/236463>. A note indicates the article is now published in *Nature Methods* with DOI [10.1038/s41592-018-0216-7](https://doi.org/10.1038/s41592-018-0216-7). On the right side, there are links for 'Download PDF', 'Supplementary Material', 'XML', 'Email', 'Share', and 'Citation Tools'. There are also social media buttons for 'Tweet' and 'Like 0'. At the bottom right, there is a section for 'COVID-19 SARS-CoV-2 preprints from medRxiv and bioRxiv' and a 'Subject Area' link.

Use cases: Teaching material

Re-using, advertising your work.

Use cases: Code

Collaboration in open-source projects *unthinkable* without openly sharing and transparent licensing

The image displays three overlapping screenshots of GitHub repository pages, illustrating open-source collaboration in bioimage analysis.

- Left screenshot (Fiji):** Shows the GitHub page for the **Fiji** repository, described as a "batteries included" distribution of ImageJ for scientific image analysis. It features pinned repositories like **fiji**, **fiji.github.io**, and **cookbook**, along with a search bar and filters for Type, Language, and Sort.
- Middle screenshot (napari):** Shows the GitHub page for the **napari** repository, described as a fast, interactive, multi-dimensional image viewer for python. It features pinned repositories like **napari**, **napari.github.io**, and **magicgui**, along with a search bar and filters for Type, Language, and Sort.
- Right screenshot (BioImage.IO):** Shows the GitHub page for the **BioImage.IO** repository, described as building AI-powered bioimage analysis model zoo. It features pinned repositories like **spec-bioimage-io**, **bioimage-io-models**, and **bioimage.io**, along with a search bar and filters for Type, Language, and Sort.

FAIR sharing

Findable

- Meta-data, unique identifiers, searchable databases

Accessible

- Open & free protocols
- Authentication / authorization

Interoperable

- [meta] data use a formal, accessible, shared, broadly accessible language
- References to other [meta]data

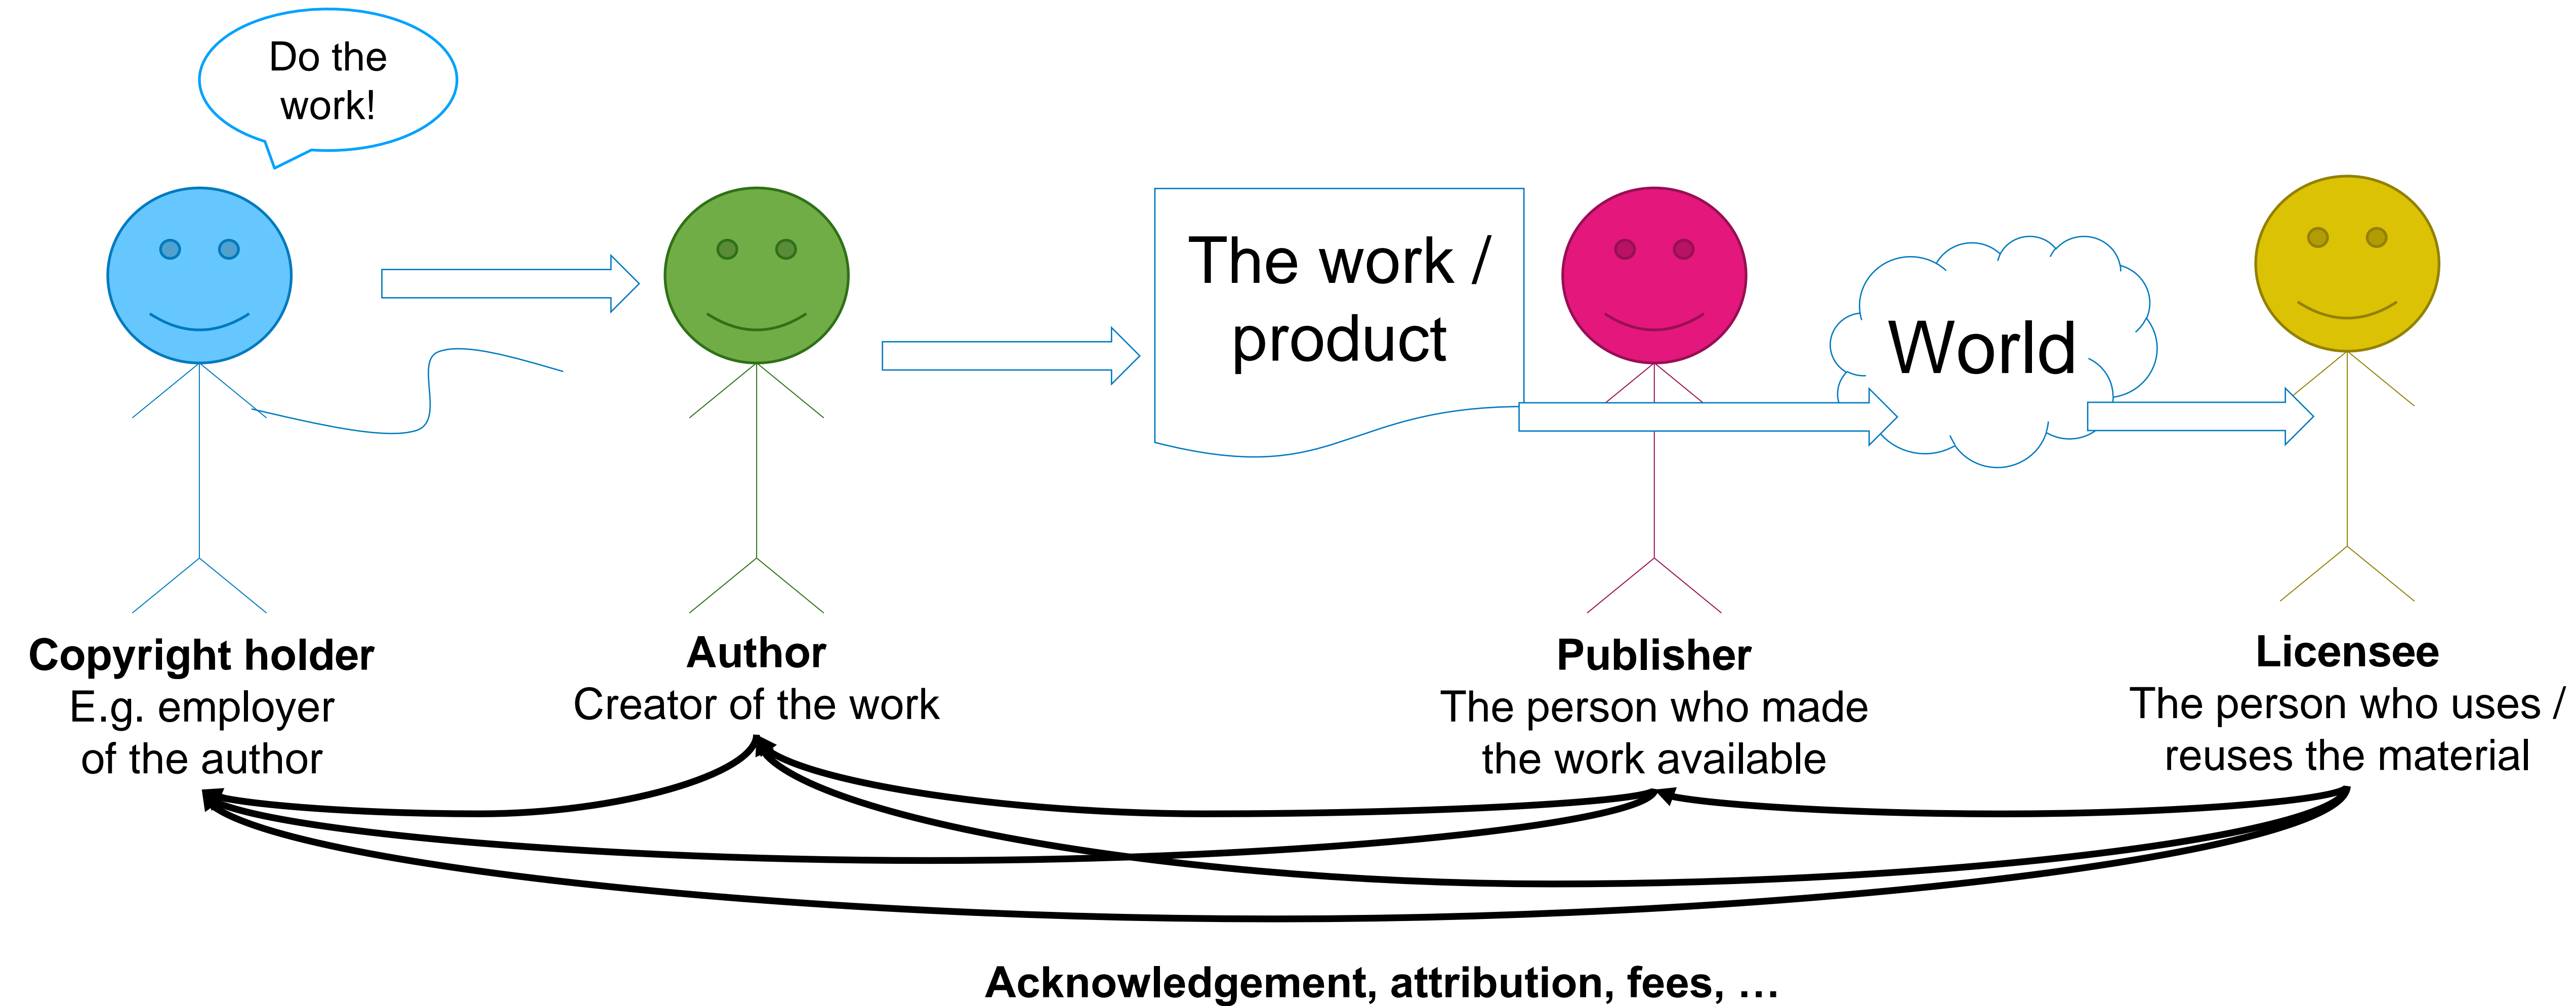

Reusable

- Properly licensed, associated relevant meta data, community-relevant community standards

~~Open Access~~

The FAIR principles have nothing to do with “Open Access”

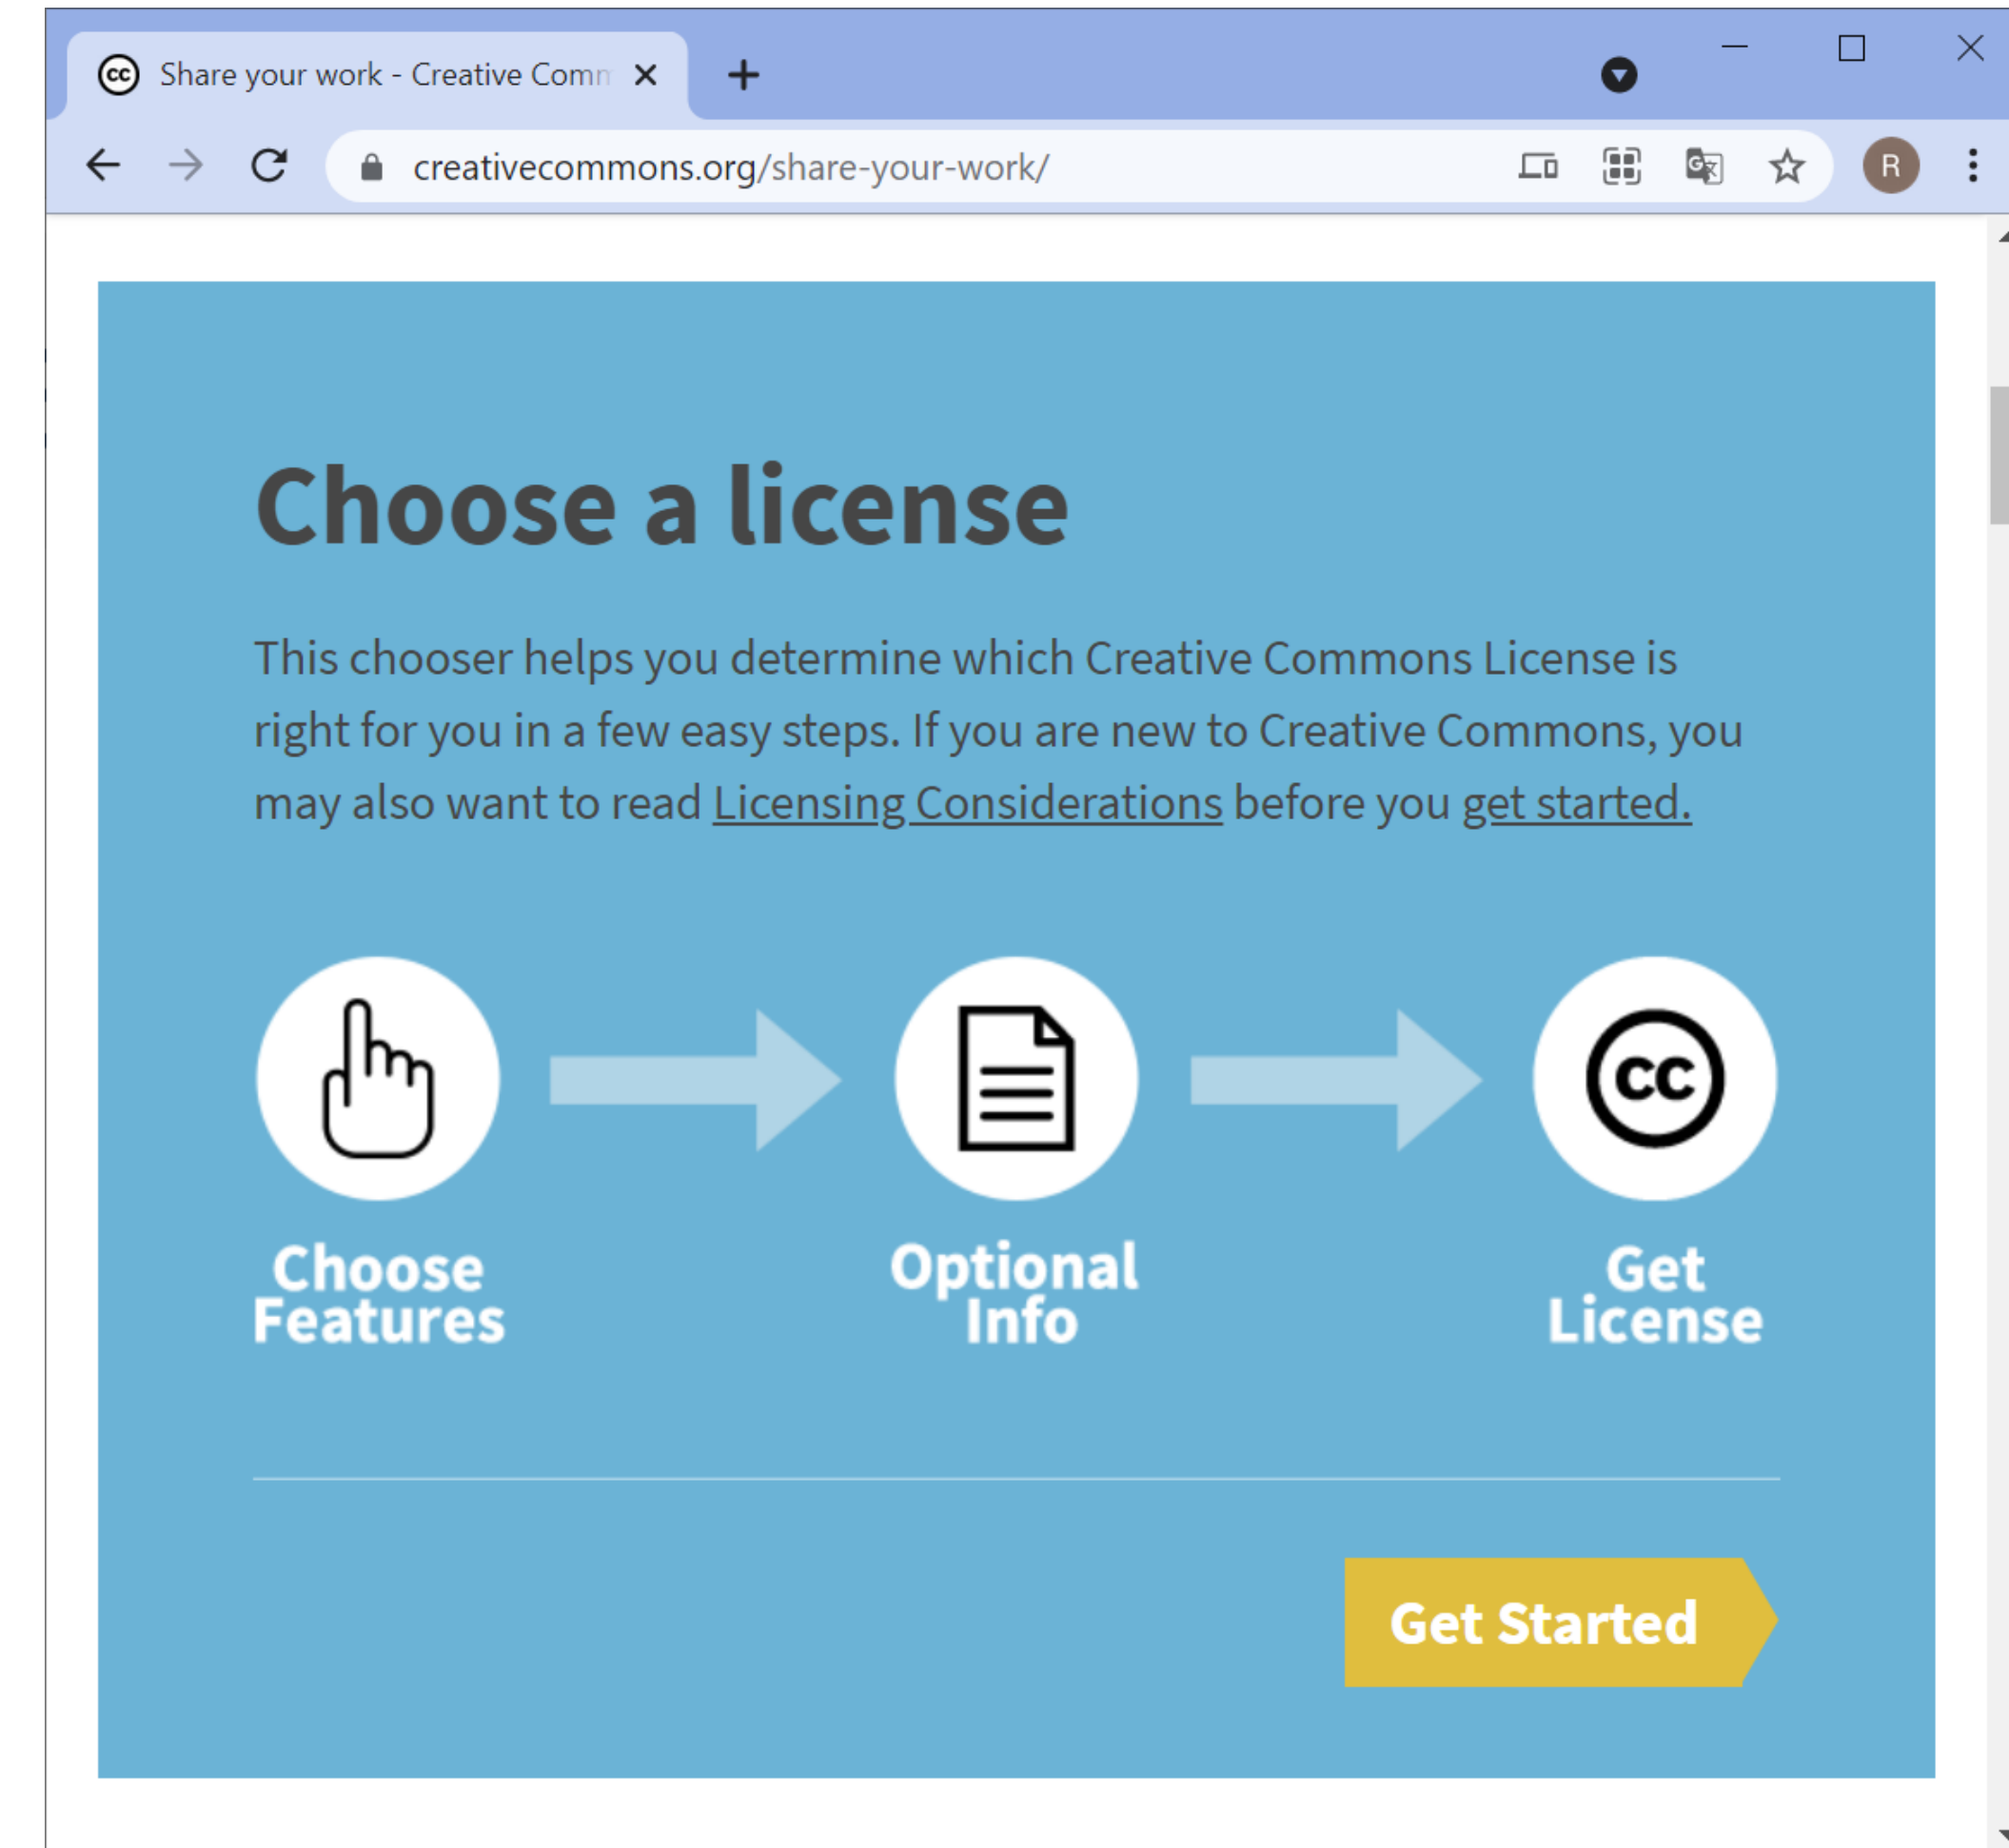

Terminology

Licensing: Creative Commons (CC)

What does CC-BY-NC-ND-SA stand for?

Combination of “NoDerivatives” and “ShareAlike” doesn’t make sense. CC-BY-NC-ND-SA doesn’t exist.

BY  – Credit must be given to the creator

NC  – Only noncommercial uses of the work are permitted

ND  – No derivatives or adaptations of the work are permitted

SA  – Adaptations must be shared under the same terms

Content on this slide was adapted from <https://creativecommons.org/about/ccllicenses/> which is licensed under a [Creative Commons Attribution 4.0 International license](https://creativecommons.org/licenses/by/4.0/). Icons by The Noun Project.

Licensing software

In the software world, other licenses are more popular, historically grown.

GPL

GNU
General
Public
License

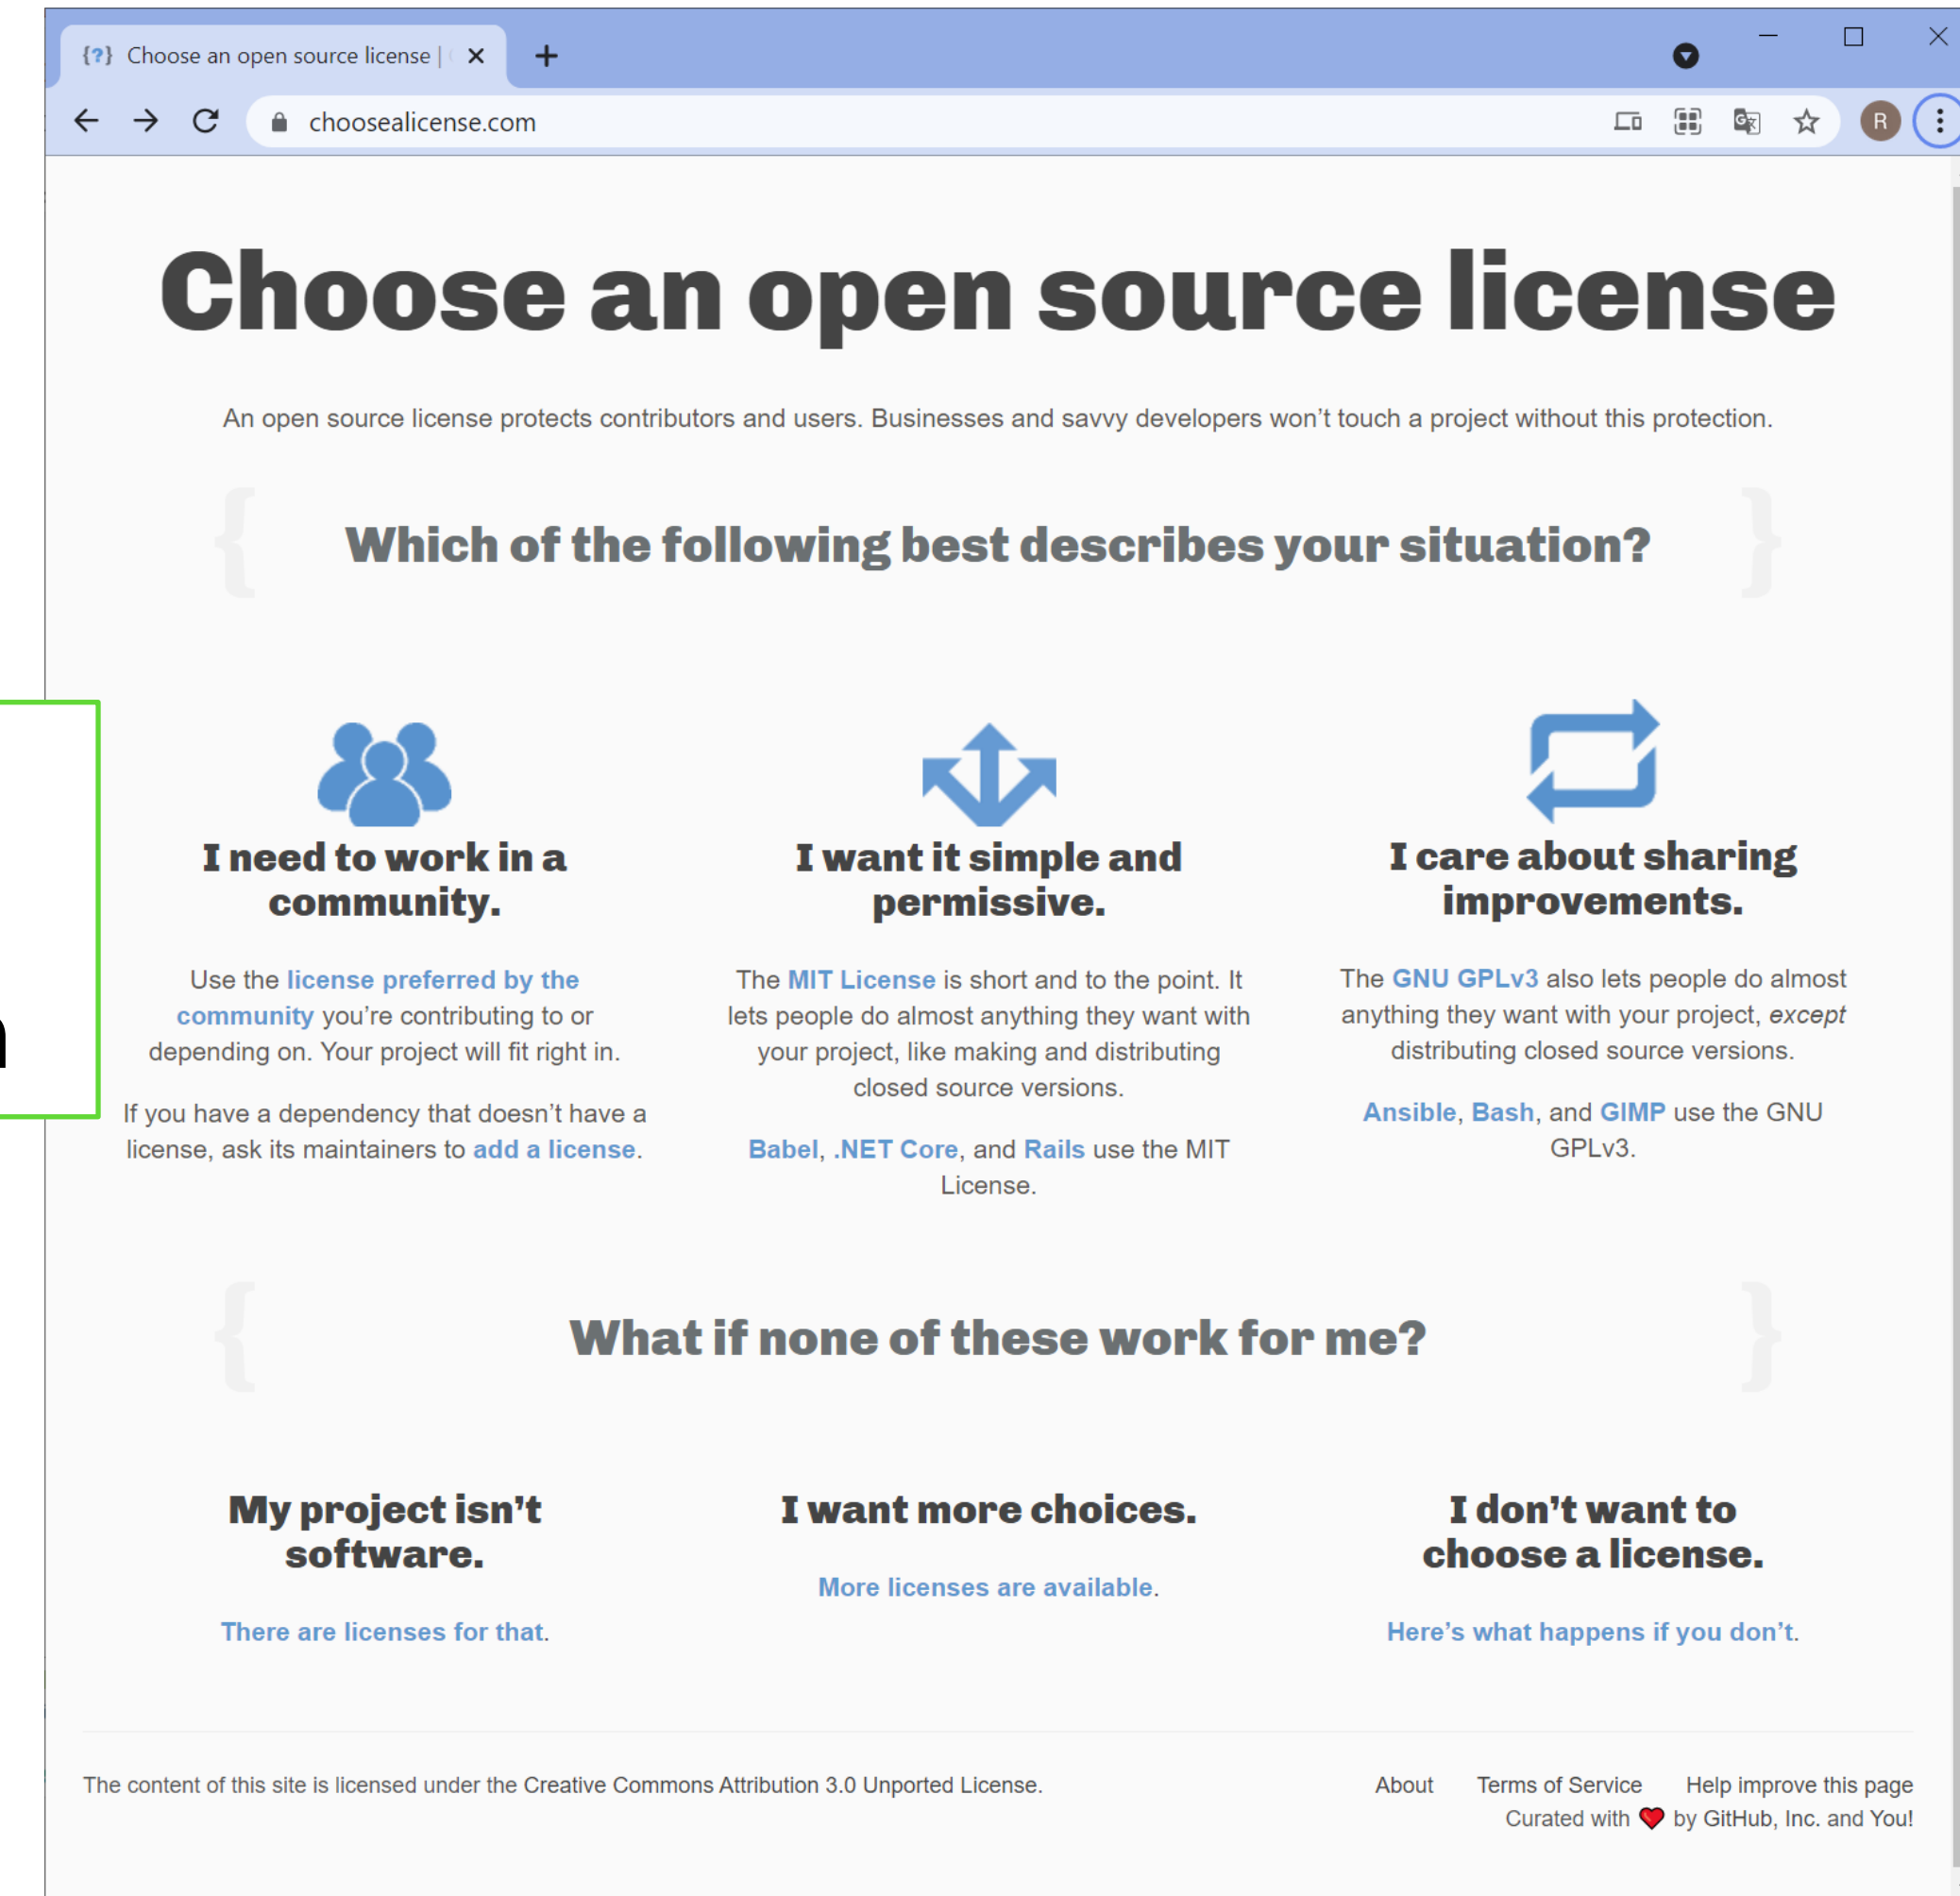

LGPL

Apache

BSD

Berkley
Software
Distribution

MIT

The screenshot shows the homepage of the 'choosealicense.com' website. The title is 'Choose an open source license'. Below the title is a subtitle: 'An open source license protects contributors and users. Businesses and savvy developers won't touch a project without this protection.' The main heading is 'Which of the following best describes your situation?'. There are three columns of options, each with an icon and a description. The first column is 'I need to work in a community.' with a group of people icon. The second is 'I want it simple and permissive.' with a double-headed arrow icon. The third is 'I care about sharing improvements.' with a circular arrow icon. Below these are three more options: 'My project isn't software.', 'I want more choices.', and 'I don't want to choose a license.' The footer contains the Creative Commons Attribution 3.0 Unported License notice and links for 'About', 'Terms of Service', and 'Help improve this page'.

Choose an open source license

An open source license protects contributors and users. Businesses and savvy developers won't touch a project without this protection.

Which of the following best describes your situation?

I need to work in a community.
Use the [license preferred by the community](#) you're contributing to or depending on. Your project will fit right in.
If you have a dependency that doesn't have a license, ask its maintainers to [add a license](#).

I want it simple and permissive.
The [MIT License](#) is short and to the point. It lets people do almost anything they want with your project, like making and distributing closed source versions.
[Babel](#), [.NET Core](#), and [Rails](#) use the MIT License.

I care about sharing improvements.
The [GNU GPLv3](#) also lets people do almost anything they want with your project, *except* distributing closed source versions.
[Ansible](#), [Bash](#), and [GIMP](#) use the GNU GPLv3.

What if none of these work for me?

My project isn't software.
There are licenses for that.

I want more choices.
[More licenses are available.](#)

I don't want to choose a license.
[Here's what happens if you don't.](#)

The content of this site is licensed under the Creative Commons Attribution 3.0 Unported License.

Similar to CC-BY

You must not use the copyright holder's name to endorse your derivative of the work.

That's also part of all CC-BY licenses

How/when to decide for a license

How?

- Choose a license compatible with your ecosystem

When?

- When the project starts
- As early as possible
- Changing the license later may be hard.
- Beware: Your employer might be the copyright holder. They have the final word on how to license, publish and make accessible your work!

Project summary

Exceptions

A note about ImageJ

Developers: How to use this page

Permissive versus restrictive

Use a license which

- is compatible to other projects you're collaborating with and
- fits to your needs / role.

Quiz

May I use one of the Figures from this preprint?

May I download and redistribute this preprint to students of a course for free?

THE PREPRINT SERVER FOR BIOLOGY

bioRxiv posts many COVID19-related papers. A reminder: they have not been formally peer-reviewed and should not guide health-related behavior or be reported in the press as conclusive.

Quiz

May I reuse code from this repository in my own GPL-licensed work?

Yes

No

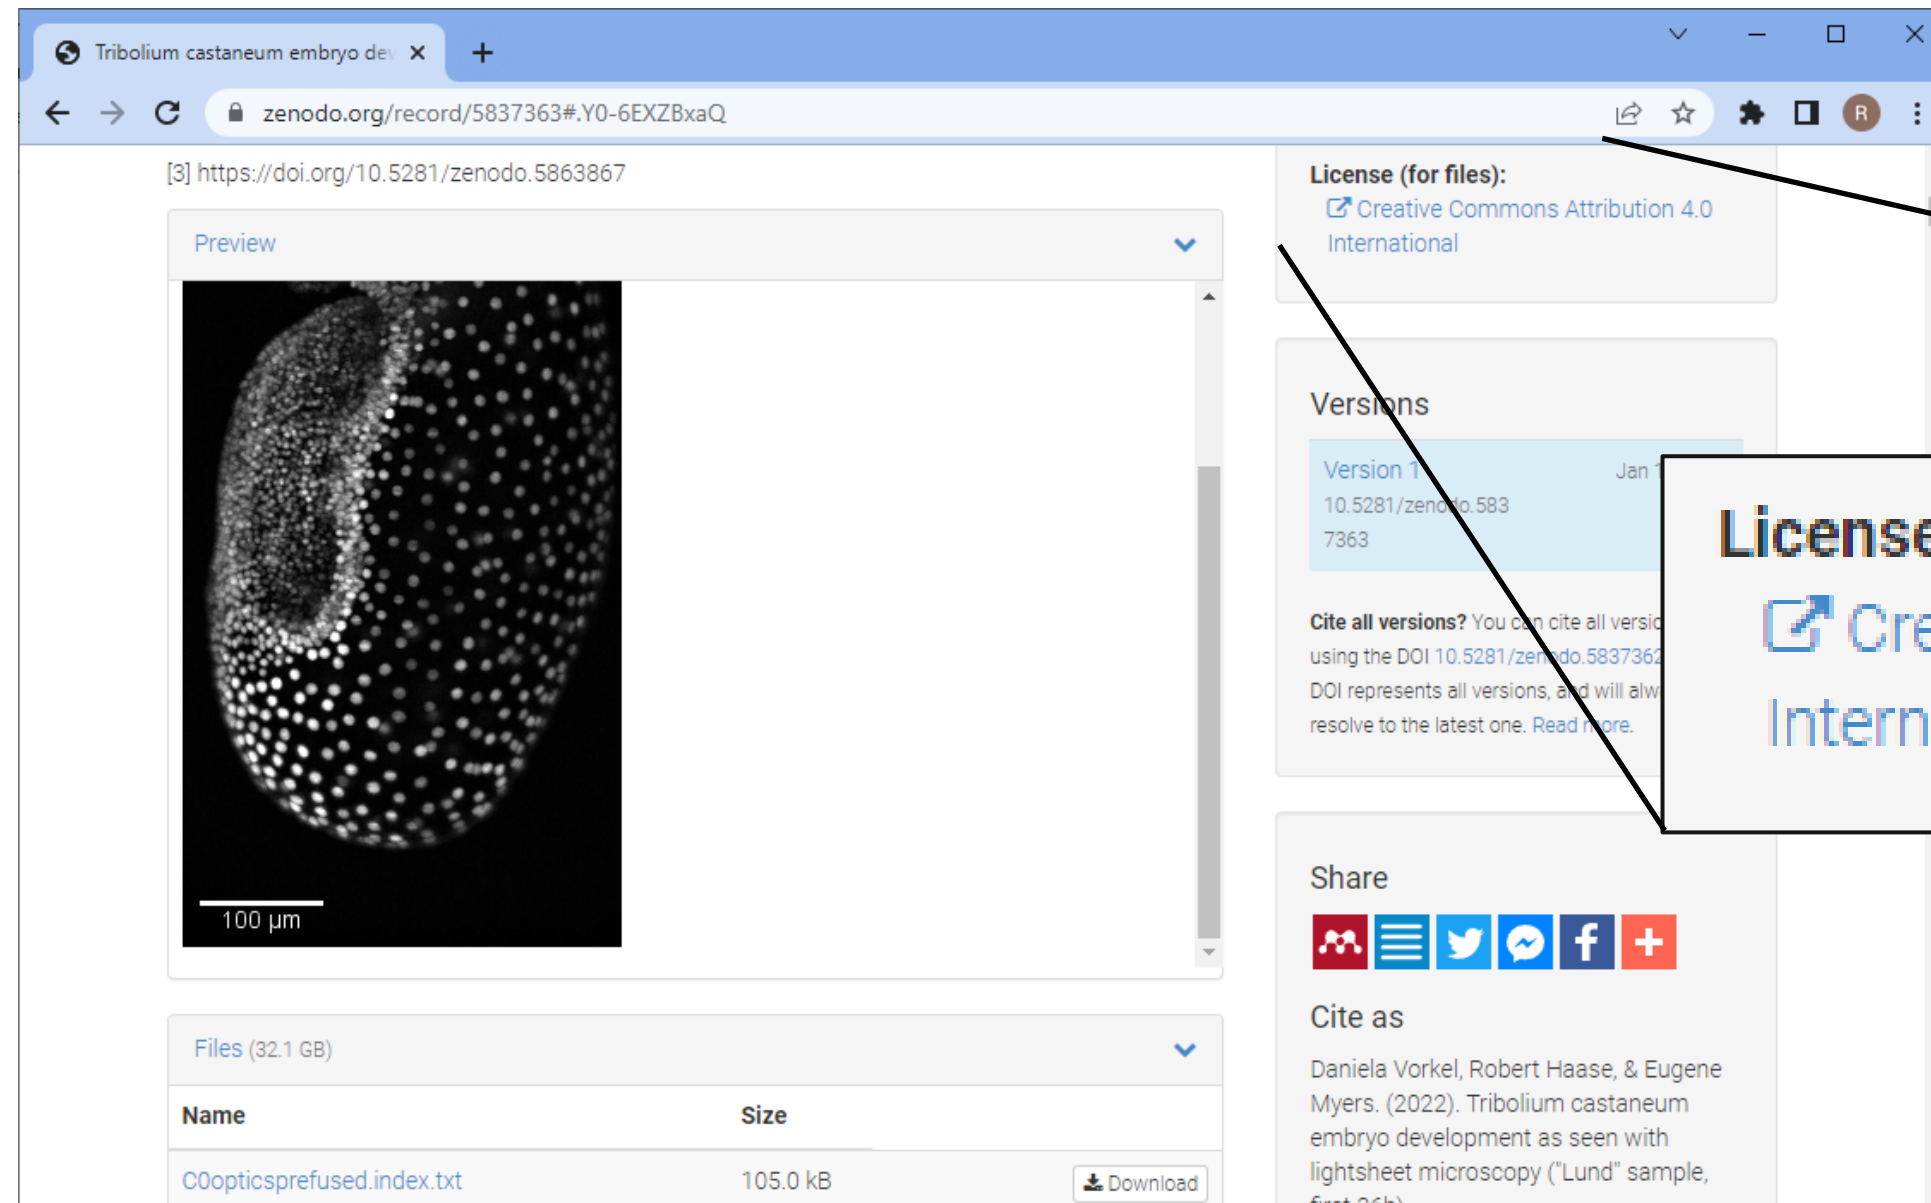

The screenshot shows the GitHub repository page for `napari/napari`. The repository is public and has 1.5k stars, 328 forks, and 45 watchers. It contains 879 issues, 81 pull requests, and 1 project. The repository is described as "a fast, interactive, multi-dimensional image viewer for python". The file list shows various folders and files, including `.devcontainer`, `.github`, `binder`, `examples`, `napari`, `napari_builtins`, `resources`, `tools`, and `env_sample`. The commit history shows recent changes, including "set selection color for QListView item" and "Add event debugging tool".

File/Folder	Commit Message	Time Ago
<code>.devcontainer</code>	feat: add codespace (#4599)	4 months ago
<code>.github</code>	Move docs to separate repo (#5216)	5 days ago
<code>binder</code>	Drop python 3.7 (#4063)	8 months ago
<code>examples</code>	Move docs to separate repo (#5216)	5 days ago
<code>napari</code>	set selection color for QListView item. (#5202)	15 hours ago
<code>napari_builtins</code>	Split out builtins into another top-level module (#4706)	3 months ago
<code>resources</code>	Re-add README screenshot (#5220)	4 days ago
<code>tools</code>	Update some strings to be translated, some to be igno...	last month
<code>env_sample</code>	Add event debugging tool (#3802)	10 months ago
